

Grow your Business with Genomics

September 29, 2021 - 3:30 to 4:30 pm CST

Boffins Event Centre, Innovation Place, Saskatoon SK or ONLINE
(Joining in person? Stay for networking after the program!)

Genomics has revolutionized all sectors around the globe. It is key to management of the COVID pandemic and has helped Saskatchewan become a leader in crop and livestock innovation.

Join us for this **Ag-West Boffins Innovation Series** event to learn more about genomics applications for crop and livestock innovation, and about **Genome360** – *Genome Prairie*'s program that aims to support the adoption of genomics to increase business competitiveness, productivity, and sustainability.

Come by to hear about the lived experiences and benefits of early adopters of genomics in Agribusiness in Saskatchewan.

Speakers:

Genomics in the Crop Industry

Carl Potts

Executive Director
Saskatchewan Pulse Growers

Dr. Sean Walkowiak

Research Scientist
Canadian Grain Commission

Genomics in the livestock Industry

Cheryl Waldner

NSERC/BCRC Industrial Research Chair in One Health
and Production-Limiting Diseases

Genome Prairie

Genome 360 Saskatchewan

This is a hybrid event (in-person and online)

REGISTER NOW!

Ag-West Boffins Innovation Series promotes innovation within the agriculture sector by highlighting original ideas and cutting-edge technology through hybrid events (online and in-person).
